

PS-12

Phoenix Active Sub-Woofer

The PS-12 is an active or powered sub-woofer which can be used for two channel organ installations. It is meant to be used with the AcoutiCubes. For home or small church installations, one PS-12 and two cubes can be used. For improved results two PS-12s and two cubes can be used.

The PS-12 is best placed in the corner of a building, with the port about 6-8 inches from the wall. Because the driver is facing the floor, best results are created on a hard surface rather than carpet.

The benefit of having an active woofer is the ability to bi-amp. The volume of the low frequencies as well as the cross-over point can be adjusted from 40-160 Hz.

Consisting of:
Floor Loaded 12" Woofer
Frequency Response: 27 Hz
Power Handling: 150 Watts
Cabinet Weight: 25 Lbs.
Dimensions: 19.5"H x 15.5"W x 15.5"D
